

Invincible Defense Technology

The Invincible Defense Technology is a proven, practical approach to world peace and national invincibility—an approach validated by more than 50 replications and 23 studies published in leading peer-reviewed scientific journals. It is a direct technological application of the most advanced discoveries in the fields of quantum mechanics, neuroscience, and human consciousness.

The approach calls for the immediate establishment of large national groups of peace-creating experts practicing specific “technologies of consciousness” that have been scientifically shown to neutralize acute ethnic, political, and religious tensions that fuel violence, terrorism, and social conflict. By defusing tensions and neutralizing animosity, this field-tested approach will immediately:

- **Defuse enmity in a potential adversary**, thus preventing the birth of an enemy and the onset of war
- **Create coherent and harmonious national consciousness**, strengthening the nation against any potentially disruptive influences from outside or within
- **Create a peaceful and cooperative global environment**, conducive to the formation of stable governments and the cessation of hostilities in regional hot spots
- **Ensure lasting peace, security, and economic stability at home**, relieving tremendous pressure on governmental departments and institutions charged with public safety and homeland security

The Invincible Defense Technology is the only approach that effectively targets the root cause of national, regional, and global conflict. It is the only approach to national security and world peace that is extensively field tested and backed by rigorous scientific research.

This Unified Field-based approach to defense generates a palpable, measurable effect of peace that creates a fertile environment in which diplomatic and other conventional approaches can actually succeed. It should be the central component of any comprehensive approach to peace and national security.

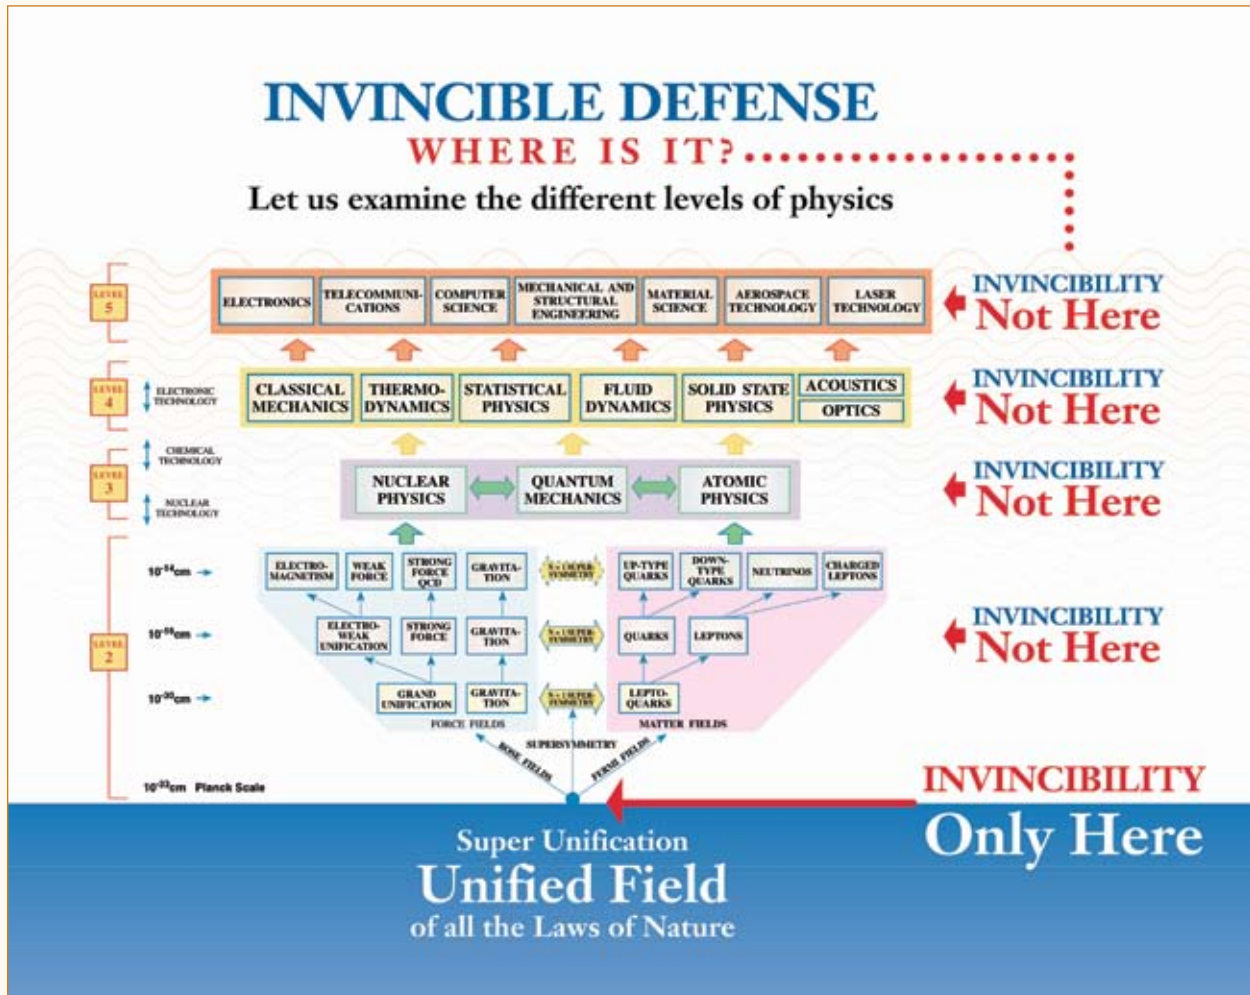

DR. HAGELIN received his Ph.D. in physics from Harvard University in 1981. He has conducted pioneering research at CERN (the European Center for Particle Physics) and at SLAC (the Stanford Linear Accelerator Center). His Supersymmetric Flipped SU-5 Grand Unified Theory, based on the Superstring, is widely considered to be the most successful Unified Field Theory to date, and his scientific contributions in the fields of electroweak unification, grand unification, super-symmetry and cosmology include some of the most cited references in the physical sciences. But Dr. Hagelin is unique in being the first scientist to apply this advanced knowledge of the Unified Field for the practical benefit of mankind. He has formulated Unified Field-based technologies that have been scientifically shown to reduce crime, violence, terrorism, and even open warfare; to promote peace and social harmony; and to render a nation effectively invincible. As Director of the Global Union of Scientists for Peace, he is mobilizing the world's foremost scientists to implement these peace-based technologies in order to halt nuclear development and proliferation, render such destructive weapons obsolete, and put an end to the legacy of war—on a proven, scientific basis. Dr. Hagelin is currently Professor of Physics and Director of the Institute of Science, Technology and Public Policy, a progressive policy think tank, at Maharishi University of Management in Fairfield, Iowa. In this role, he heads a nationwide effort to identify, scientifically verify, and promote cost-effective solutions to critical social problems in the fields of crime, health care, education, economy, biotechnology, energy and the environment.

Scientific Foundation

THE UNIFIED FIELD

Progress in theoretical physics during the past quarter century has led to a progressively more unified understanding of the laws of nature, culminating in the recent discovery of completely unified field theories based on the superstring. These theories locate a single, universal, Unified Field of intelligence at the basis of all forms and phenomena in the universe. Millions of times more fundamental and more powerful than the nuclear force, the Unified Field is the ultimate source of the order displayed throughout the vast universe.

The Invincible Defense Technology constitutes a direct technological application of the Unified Field. Because it works at the deepest, most powerful and holistic level of Natural Law, its effects are pervasive and inescapable. It can easily overpower—and effectively disarm—conventional technologies of offense based on the electronic, chemical, biological, or nuclear levels. Yet it is inherently safe, despite its power, because it is based on the application of a completely holistic level of Natural Law.
